

Nature Suncatchers

Here's what you need:

- Paper plate (cardboard or ice cream sticks will work too)
- Clear tape
- Scissors
- A selection of flowers/flower petals/leaves to decorate

Here's how:

1. Go outside and collect flowers, petals, leaves, etc.
2. On the paper plate, draw a circle about an inch away from the edge of the plate. If you are using cardboard do the same, it can be any shape you like! If you are using ice cream sticks, create a frame by connecting and gluing/taping up the corners.
3. Cut out the inner circle or shape that you have drawn to create a frame. (Skip this step if using ice cream sticks).
4. Using clear tape, tape across the paper plate/cardboard until you have covered the entire cut-out hole. One side should be sticky, and the other side should be smooth.
5. Then, with the sticky surface face up, stick flowers, leaves or petals to decorate. Feel free to be creative!
6. Once you are done, use clear tape to tape across the sticky side of the cut-out. When you are finished, you should have two smooth sides with the decorations caught between the tape.
7. Optional: Tape or hang the suncatcher in a window so that it can catch the sunlight!
